## WASTEWATER TREATMENT

### COMPACT & CONTAINERISED TREATMENT PLANTS

BIO-PLANTS WITH  
MBBR-IFAS TECHNOLOGY  
(200-20000) PE

MUNICIPAL

LARGE WWTP MBBR-IFAS & MBR TECHNOLOGIES  
IN MODULAR STEEL BOLTED TANKS OR CONCRETE BASINS

BIO-PLANTS WITH MBMR (UF) TECHNOLOGY  
SEPARATOR (200-20000) PE

TERTIARY UF TREATMENT  
PLANTS

PACKAGED DAF  
SEPARATOR

## WATER RE-USE

## POTABLE WATER TREATMENT

ADVANCED PACKAGED WATER TREATMENT PLANTS  
CONTAINERISED PLANTS WITH UF & RO TECHNOLOGIES (DESALINATION)

PRE-ENGINEERED PACKAGED W.T. PLANTS  
WITH FLOCCULATION + SEDIMENTATION + RAPID  
GRAVITY FILTRATION

## SLUDGE MANAGEMENT

CONTAINERISED  
PLANTS WITH SCREW PRESS  
OR CENTRIFUGE DECANTER

CONTAINERISED SLUDGE DEWATERING PLANTS  
FOR STP 1500-20000 PE

## INDUSTRIAL

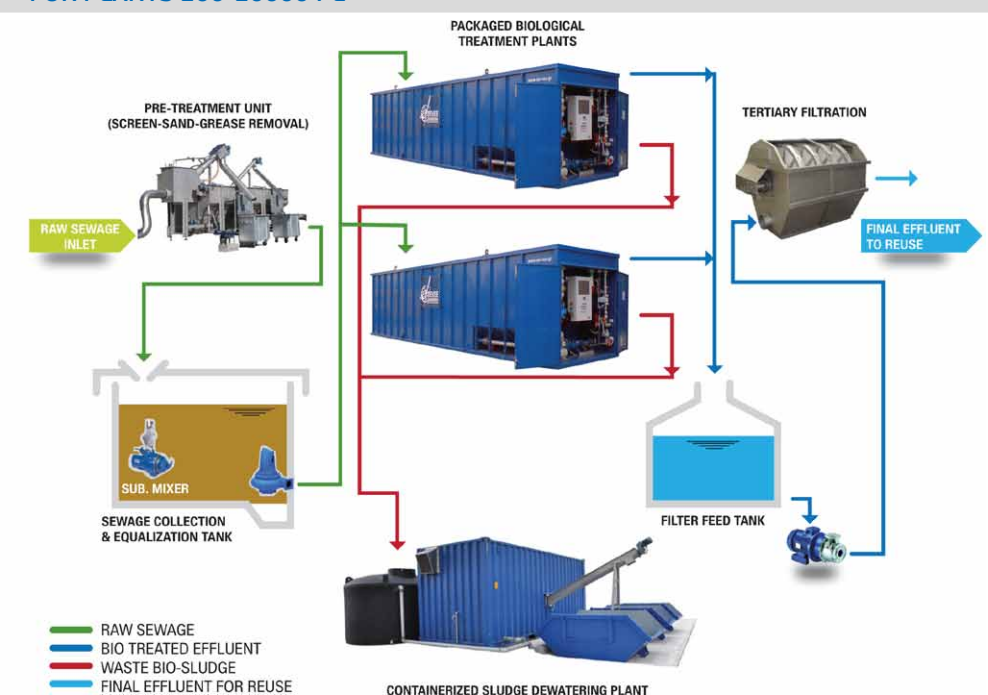

COMPLETE PACKAGE SOLUTIONS  
FOR INDUSTRIAL WASTEWATER  
(FOOD & BEVERAGE, PHARMACEUTICAL, OIL-GAS ETC.)

## WASTE TO ENERGY

COMPLETE PACKAGE SOLUTIONS  
FOR MUNICIPAL SEWAGE TREATMENT  
FOR PLANTS 200-20000 PE

## COMPANY PRESENTATION

DEVISE ENGINEERING S.A. is a specialist company in the field of environmental technologies. The company's main activities are the design, engineering and construction of "Packaged Plants" for the treatment of Water and Wastewater. DEVISE ENGINEERING S.A. has developed some very innovative systems of a compact and pre-fabricated format which are an excellent solution for the sewage treatment of small communities and municipalities, while they can be a unique alternative to the wastewater treatment of industrial effluents. DEVISE offers its clients a high standard of services and always strives to find the most optimum solution to their environmental concerns. The ISO 9001:2008 Quality Assurance Certificate that the company holds for the Design-Construction and Maintenance of Water & Wastewater Treatment Systems is a reassurance that our clients will get a product of high quality at the best value money can buy. The construction and testing of company's own make products (pre-fabricated plants) takes place in the Aspropyrgos warehouse and at selected associated steel subcontractors while the quality of manufacturing is monitored closely at all stages according to the ISO Q.A. system.
