

Today's dominating environmental challenges underline more than ever the necessity to efficiently and effectively act in order to ensure a better quality of life for the future generations. DEVISE is dedicated to serve this purpose by offering environmental solutions & services to both municipalities and the industry.

With an extensive experience of more than 20 years, DEVISE specializes in the advanced design, engineering and manufacture of "Smart Package Plants" for the treatment of Water and Wastewater, covering the full spectrum of Municipal & Industrial Applications, as well as the oil and gas sectors.

The result is a Smart Solution, which incorporates Innovative Treatment Technologies & Processes - appropriately selected for each case - that consistently offers efficient operation and high quality treated effluent, in a cost effective way.

Whether municipal or industrial application, DEVISE always strives to offer optimum solutions to its clients. In combination with the significant know-how of its team of expert engineers and technicians, DEVISE is currently placed among the pioneering companies in the field of Package WWTPs.

Along with an extensive network of local representatives and agents throughout the world, DEVISE has established a strong global presence, excellent reputation and a proven track record of successful international projects.

- Environmental Technologies  
for Water-Wastewater Treatment  
Compact & Pre-fabricated Plants

**Environmental Technologies  
Provider and Plant Manufacturer**

## DEVISE Portfolio

DEVISE is considered an one-stop shop for a complete set of solutions. *Our Portfolio includes:*

### Package Plants

Complete Wastewater Treatment Plants utilizing compact, prefabricated, portable and modular units, constructed in DEVISE modern production facilities. These plants can either be supplied as single units for a specific range of capacities or could be provided as a Design & Build project.

#### Unique Advantages

- Pre-engineered & prefabricated plants
- Modular design
- Fully tested before dispatch
- Ready to "plug & play"
- Easy transportation, deployment and installation
- Ideal for future expansion
- High quality treated effluent
- Fully automatic – PLC controlled system
- High & reliable system performance
- Easy & low maintenance
- Space saving – Small foot print

### Technologies & Processes

DEVISE is an experienced technology provider with wide and extensive know-how on the treatment processes of water and wastewater applications.

This capability allows us to offer specialized engineering services, which, combined with the manufacture of packaged systems, can provide our clients a tailor made solution for their project.

#### Typical Applications

Municipal	Industrial	
Decentralized communities up to 25,000 P.E	Food Manufacture / processing	Chemical Industry
Hospitals	Soft drinks production	Petrochemical
Holiday Camps, Hotels	Wineries, Breweries	Poulties
Military Camps	Textile Industry	Slaughter Houses
Universities	Pharmaceuticals	Landfill Sites

### Services

DEVISE offers installation, start-up, commissioning, customer training as well as operation and maintenance services, using a team of highly qualified and experienced engineers & technicians.

### After-Sales Service

DEVISE offers after sales assistance, full technical support, quality spare parts delivery, equipment assessment & refurbishments.
