

DEVISE at Clean Technologies Business Mission in China !

DEVISE ENGINEERING proudly announces that it recently participated at the **EU Gateway to China 2017 Clean Technologies Business Mission** that took place 19-24 March, in Beijing.

DEVISE was selected -among thousands of candidates across the EU- to be one of the privileged companies that would benefit from the unique services of this EU-funded program.

The agenda of the Business Mission Week included detailed briefing sessions, interesting presentations, exclusive networking events, enjoyable site visits and a productive two-day exhibition.

Throughout the **“Clean Technologies” mission**, Mr. Andreas Koutsoukos, the Managing Director of DEVISE had the opportunity to showcase the company’s products and technologies and held various business meetings with local companies and sector-related business organizations and associations.

During the business mission DEVISE learned a lot about the Chinese market needs and established useful contacts in the dynamic Chinese market which will ensure further access to new business opportunities in the territory.

The EU Gateway Program provided resourceful market intelligence, coaching on doing business in China and a promotional campaign that will assist DEVISE to develop its business to the promising Asian Water Market.
